secretair

Individual workstation

Versatile, flexible and discreet: a perfect example of a solo desk

The personal secretaire is back – re-interpreted for the modern age and elegant at the same time. secretaire is a versatile mobile station for temporary working and stands out due to its light, uncluttered appearance. The fresh design and the high-quality materials ensure privacy and a homely atmosphere. secretaire creates places that invite people who need somewhere to concentrate closely on their work and where they also feel at home.

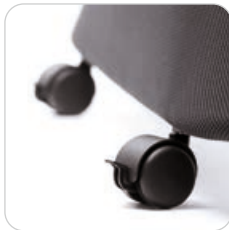

Specialist in versatility

Thanks to its contours and its mobility, secretair can easily be adapted to accommodate new requirements. From circular groupings that facilitate communication to placing one behind the other to encourage maximum concentration.

secretair can be used to design the most varied of scenarios and be re-arranged in just a few moments. The built-in equipment is also multi-faceted. A light, shelves and electrification make secretair into an autonomous workstation for the most varied of activities.

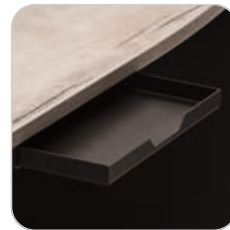

Mobile. Due to two smooth-running castors, the position and orientation of secretair can be effortlessly altered.

Communicative. On request, secretair can be supplied with an attachable multi-socket for notebooks, tablets etc.

Focused. As an option, secretair can be equipped with a luminaire that supports concentrated working.

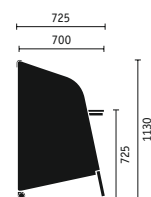

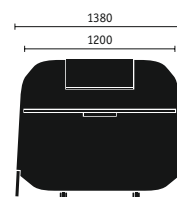

Uncluttered. Directly under the working surface, there is a drawer for personal belongings or pens etc.

Practical. The metal shelf also serves as a magnet board, while the variety of optional colours enables individualisation.

secretair can be individualised stylishly with selected surfaces and high-quality real-wood veneers. A coherent design concept, secretair bridges the gap between main office and home office.

Sustainability down to the smallest detail

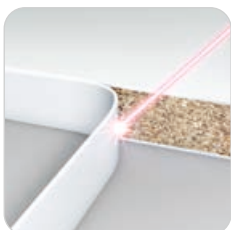

Sustainability and “Made in Germany” quality are among the central corporate principles that Sedus has adhered to for more than 50 years. Principles that the secretair also embraces and which reflect the recycling-oriented product design, ecologically tested materials, resource-sparing and energy-conscious manufacturing and permanent quality tests.

Solvent-free powder coating instead of conventional paint is therefore used to make secretair. In addition, only three different types of material, namely wood, metal and fabric, are used for secretair. These can easily be sorted later and recycled.

You will find more information at www.sedus.com

Innovative laser edge.

Superb seamless edging that combines robustness, attractiveness and environment-friendliness harmoniously.

Sustainable and local.

Real-wood veneers from sustainable local forests are not only fascinatingly beautiful but also reduce the number of kilometres over which the wood has to be transported.
